Treasure Lab
COACHING & DEVELOPMENT FOR CHANGE

The Agile Mindset

A game-changer, merging the power of Agile Move with real-world applications tailored to your role

DISCOVER the benefits of **agile thinking** & learn to apply them to your daily work!

DESIGNED for those who want to think and work in a more agile way

AGILE MINDSET an online series with Celemi Agile Move digital business simulation

How will I benefit?

- You will experience the benefits of agile thinking through a business simulation
- You will find out how decisions that are agile or not influence business impact
- You will reflect on your own work processes and how to make them more agile
- You will create an action plan to incorporate new ways of agile working

Our Methodology combines:

- Celemi Agile Move Business Simulation
- Team Coaching Discussions
- Team and Self-Reflection Exercises
- Personal & Team Action Plans

CELEMI AGILE MOVE

A digital business simulation that allows participants to explore and develop an agile mindset. The simulation is set in a fictitious company dealing with the typical operational, strategic and leadership challenges that many companies are facing today. Participants work though the challenges, discuss and agree which route to take. They get instant feedback on how well their decisions align with agile principles and what the business impact of each decision is.

The Agile Mindset

Client testimonials

- *"It felt meaningful and it allowed me to discover things about myself and team mates. Also, the fact that it enhanced my ability to be open to change and the value that this brings was a big plus for me".*

- *"I liked the hands-on approach, which enables people to understand the complexity of agile decision making and the active effort someone needs to make in order to be successful at it".*

- *"The chance to discuss with team members with a different point of view helped me swift to a more agile mindset. Actually I saw in practice what agile mindset means and worked on real life examples".*

- *"I saw how decisions in a working scenario are being grounded on specific Agile principles. Up to date, I only had the perspective of Agile in theory but could not make the connection with practice".*

- *"I liked the interactivity of the session, the successful simulation of reality, and the usefulness of the real-life application of the topics discussed".*
